CALL FOR PAPERS
AMCIS 2023
Diving into Uncharted Waters

++

We invite the submission of completed research papers, Emergent Research Forum (ERF) papers, Technology Research, Education, and Opinion (TREO) talks, Professional Development Symposia (PDS), workshops, and panels to the 29th Americas Conference on Information Systems (AMCIS). To be held August 10-12, 2023, AMCIS 2023 will bring together academics and industry professionals around the world to exchange knowledge related to diverse facets of information systems research and practice.

AMCIS 2023 will provide exciting opportunities for participation, collaboration, and dialogue related to the conference theme "Diving into Uncharted Waters." With your contributions, we will present an exciting program that draws upon the best of SIG-driven AMCIS traditions. We anticipate thought-provoking presentations and stimulating discussions that exemplify this incredible discipline of ours.

There are numerous benefits to authors leveraging the conference to journal submission cycle for papers. Click here to learn more.

Submission Types
++

Full papers must describe completed research. Completed research papers will be submitted to a conference mini track where they will be peer-reviewed using a double-blind system and presented in a session format. Each session will consist of three or four competitive papers accepted through the review process. Sessions employ a standard format of presentation by an author and general audience discussion. Full papers must not exceed 10 pages (approx. 5,000 words) and must conform to the AMCIS 2023 submission template. Full papers that are accepted will be published in their entirety in the conference proceedings.

Emergent Research Forum (ERF) papers are research in progress. Like completed research, ERF papers will be submitted to a mini track for double blind review. Upon acceptance, ERF papers will be presented by authors while interested participants gather to share ideas and discuss topics of mutual interest. ERF papers must not exceed 5 pages (approx. 2,500 words) and must conform to the AMCIS 2023 submission template. Authors of accepted ERF papers may submit an abstract for the proceedings OR a revised paper.

Technology Research, Education, and Opinion (TREO) Talks sessions will provide attendees a platform to present their research ideas, education papers, or opinion papers that cover any area of information systems (IS) or information technology (IT) and get feedback from session attendees. The TREO Talk sessions will provide the opportunity to submit a 1-page abstract of a research paper or research idea, an education paper or an idea related to IS education, or an opinion paper on any area of information technology. TREO Talks submissions will be editorially reviewed to ensure that they are IS related and appropriate in nature. Accepted TREO Talks abstracts will be presented at a TREO Talk session. Each TREO Talk author will present their topic, followed by a question and answer and discussion session with the audience.

Professional Development Symposia (PDS) offer the opportunity for creative, multi-way conversations, and have the potential to offer a positive impact on the professional development of participants from different regions, SIGs, chapters, career stages, or demographic backgrounds. Proposals can be quite brief but should provide an outline sufficient for the reviewers to be able to make a recommendation on its applicability, likelihood of drawing an audience, and suitability. Some indication of likely authors and presenters would be helpful.

Workshops are typically partial- or full-day sessions that facilitate discussion and exploration of ideas, techniques, and methodologies that advance research, teaching knowledge of IS-related concepts, or products from industry and their application to academia, educational curricula, or industry practice.

Panels provide an opportunity for a group of researchers to explore a topic or focus of interest in a panel format, typically involving a panel moderator (who poses several questions related to the topic) and three to four expert contributors with alternative views or perspectives on the topic. Depending upon the topic, the experts can be drawn from the academy and/or from industry. Of particular interest are panel submissions that are related to the conference theme, although panel proposals on other relevant topics are also welcome. The panel co-chairs are willing to work with panel submitters to help them develop provocative ideas into strong proposals.

Virtual paper presentations

New this year – we will accept full and ERF papers for in-person presentation as well as for virtual presentation. For several years we've had no choice but to allow for shifting to online formats due to shifting threats from the global pandemic. This year, we are going to try to create more virtual opportunities that are intentional. We still anticipate a strong in-person set of papers and vibrant experience, but we also want to encourage you to submit your best work even if you already know that you will not be able to be physically present. Authors of accepted virtual presentation papers will be provided an asynchronous platform for their work.

++

Submission Information:
All submissions must be made via the AMCIS 2023 PCS submission system. After creating an account and logging on to the PCS site, authors should go to the "Author Center" to make their submission. Specifically:

- Visit the AMCIS 2023 website for a complete list of tracks and mini-tracks that are available and to determine the proper mini-track for your submission prior to submission. Please contact the relevant track/mini-track chairs with any questions or concerns.
- If there is any conflict of interest between the author(s) and the track or mini-track chairs, the paper must be submitted to the "General Topics" mini-track within the Conference Theme track – Diving into Uncharted Waters.
- Determine the proper type for your submission by reviewing the types of submissions on the conference website. Submission instructions, templates, and forms can also be found on the website.
- Note that every author (co-author) is limited to a maximum of three papers in the Full papers and ERF categories together. You must use the templates provided on the website for formatting your submissions.
-

Important Dates:

- January 6, 2023: Manuscript submissions begin
- March 1, 2023: Submissions are due at 10 a.m. EST
- May 9, 2022: TREOs, PDS and Workshops, and Panels submissions are due at 10 a.m. EST

Scholarly integrity is a core value in our discipline, and all AMCIS submissions must comply with AIS policies. Scholars submitting papers to this conference thereby attest that they have read the AIS Code of Research Conduct, and that the work submitted is in accordance with the Code in all appropriate respects. Editors of AMCIS conference proceedings who receive allegations of plagiarism or other scholarly misconduct may inform the AIS President, who may refer the matter, at his/her discretion, to the AIS Research Conduct Committee.

We look forward to receiving your AMCIS 2023 submissions!

If you have any questions, contact track chairs directly or send an email to one of the addresses below. For questions about templates and submission process, contact the Review Coordinators.

Sincerely,

AMCIS 2023 Program Team
