

PACIS 2022 Doctoral Consortium: Call for Nominations

Important dates	
Nomination deadline	March 15, 2022
Notification of acceptance	May 1, 2022
Doctoral Consortium (online)	July 5, 2022

We invite you to make nominations for the 26th Pacific Asia Conference on Information Systems (PACIS) Doctoral Consortium. The Doctoral Consortium will be held **online** on July 5, 2022.

Universities are invited to nominate candidates for the Consortium. Eligible candidates are Ph.D. students in Information Systems (IS), who have developed a plan for pursuing their dissertations and would benefit from constructive feedback from senior faculty in the IS field. The Consortium aims to provide doctoral students with an opportunity to share their research ideas and network with peers and experienced scholars serving as faculty advisors. The faculty advisors are eminent scholars in the IS field from leading institutions around the globe. These faculty advisors also serve in senior editorial positions in the field's top journals. This Consortium will be a significant event for emerging IS researchers in the Asia Pacific region and the rest of the globe.

Nomination eligibility

Ph.D. students who are currently working on a doctoral dissertation in IS. The research should have progressed to the point where a clear plan of investigation has been laid out but there is sufficient scope for changes to this plan based on feedback from the Consortium. The ideal Consortium candidate should have at least 6-12 months of work remaining at the time of the Consortium. The nominated candidates must be sufficiently proficient in English to participate in the Consortium since the language of the Consortium will be in English. While priority will be given to students from institutions in the Asia-Pacific region (AIS Region 3), strong nominations from other AIS regions will also be seriously considered.

Nomination process

Though more than one nomination is allowed from a single institution, we require that multiple nominees be ranked by the nominating institutions. The first-ranked nominees will have an equal chance against other first-ranked or sole nominees. The second-ranked nominees would only be considered after all first ranked/sole nominees are evaluated and selected. Students must be nominated by the chair/head of an IS unit (not individual faculty members). The nomination should follow the following guidelines.

A submitted proposal should outline the research topic, research question(s), theoretical foundations, proposed research methodology, current stage of the research, and plans for completion. A nomination letter from the chair/head of the IS unit should certify that the candidate is the nominee from the university/institution and that the candidate meets the eligibility criteria mentioned above.

Nomination submission requirements

The proposal should meet the requirements of short paper submissions for PACIS. Submit your proposal (short paper and nomination letter in one PDF file) to the PACIS 2022 official website at <https://new.precisionconference.com/user/login> before the deadline. It must not exceed the requirements of short paper submission. The letter of nomination should include the candidate's full name, affiliation (university and school/department), and all contact details of the Ph.D. student and the person who makes the nomination. The candidate should also indicate the name of his or her principal faculty supervisor.

Consortium schedule

The Consortium will be conducted fully online. Please check the tentative program here: <https://pacis2022.aisconferences.org/events/doctoral-consortium/> The Consortium will include a balanced mix of students representing diverse research topics, methods, schools, and cultures. Each student will present his or her research in a designated parallel stream led by 2-3 faculty advisors, who will have carefully reviewed the student submissions.

Registration and cost

There is no charge for the Consortium. More information about the Consortium will be provided at a later date.

Submission contact information

Please contact Doctoral Consortium Co-Chairs if you have any questions.

Doctoral Consortium Co-Chairs

Patrick Chau, University of Nottingham Ningbo China,
Patrick.Chau@nottingham.edu.cn

Keng Siau, City University of Hong Kong, klsiau@cityu.edu.hk

Jose Benitez, EDHEC Business School, jose.benitez@edhec.edu

Faculty Mentors

Jose Benitez, EDHEC Business School

Patrick Chau, University of Nottingham Ningbo China

Kenny Cheng, University of Florida

Alain Chong, University of Nottingham Ningbo China

Yulin Fang, University of Hong Kong

Susanna Ho, Australian National University

Atreyi Kankanhalli, National University of Singapore

Carol Ou, Tilburg University

Keng Siau, City University of Hong Kong

Chih-Ping Wei, National Taiwan University

Sean Xin Xu, Tsinghua University
